

30+ Team Members

RHINO

Rhino provides smart devices and software that help monitor the energy, water, and gas consumption of buildings. Their services are targeted towards various industries such as logistics, office, and retail. Rhino provides industry leaders with all the data they need to effectively manage energy, reduce CO2 emissions and draw up ESG reports.

Goals: Improving operational efficiency, Improving sustainability, Decreasing costs

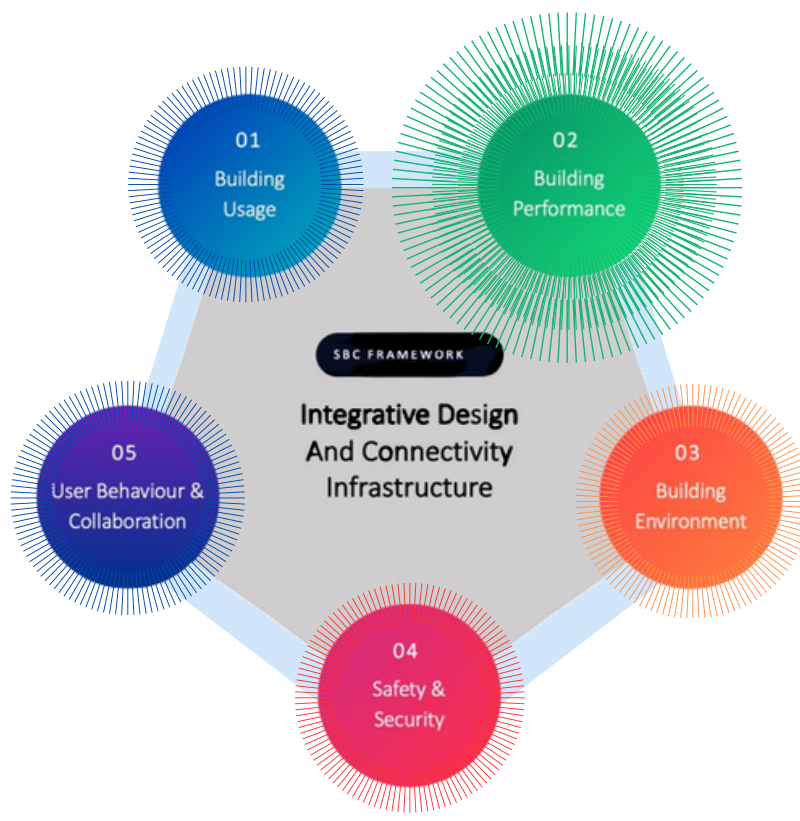

Geographical Reach: Europe

Providing 3 Complementary Solutions

- RHINO AP
- RHINO PLATFORM
- RHINO API

"Rhino improves operational efficiencies with automated controls and notifications, enhancing tenant experiences and management capabilities, thus fostering a sustainable, efficient, and responsive building environment."

Office | Retail | Education | Warehouse & Logistics | Residential | Hotel, Restaurant, Bar
